QA Tester with 4.5 years of experience in AAA game development, specializing in manual testing across large-scale and VR projects. Experienced in creating and executing test plans, identifying and documenting defects, feature testing, regression testing, and working closely with development teams throughout the production cycle. Strong hands-on experience with Jira, TestRail, Jenkins, and Telescope, with additional knowledge of C#, C++, HTML/CSS, and test automation using Cypress.

PROFESSIONAL EXPERIENCE

Development Tester
Ubisoft Belgrade
May 2025 - July 2026

- End-to-end manual testing of AAA game features, including regression and exploratory testing.
- Created test plans, investigated issues, and tracked defects using Jira, TestRail, Jenkins, and Telescope.
- Provided actionable feedback on features and collaborated with developers and QA teams throughout development.

Junior Development Tester
Ubisoft Belgrade
Feb 2022 - May 2025

- Manual testing of AAA game features, including functional and regression testing.
- Created and maintained test cases and reported defects using Jira.
- Ensured the quality of assigned project features
